Subject: Blue Community letter asking for your consideration

Dear Mayor Burghardt-Jessn,

Attached please find a letter describing what it means to be a Blue Community. We are asking you and other municipalities in the Upper Thames/Antler River watershed to consider becoming a Blue Community. This could result in the Thames/Antler becoming the first Blue Community watershed in the world.

We believe you already meet one of the three criteria in that you own and operate your water systems and that they are not privately owned and for private profit.

We hope you will consider and find this an inspiring idea as more than 200 communities in the world have done.

We hope to hear from you.

Lynn Brown
Chair, Blue Community Committee
London Chapter of the Council of Canadians
